#### ACCESS SERVICE

## 9. <u>Directory Assistance Access Service</u> (Cont'd)

#### 9.3 <u>Service Provisioning</u> (Cont'd)

# 9.3.1 Manner of Provisioning (Cont'd)

(C) At the customer's option and where technically feasible, DA (T)
Access Service may either be provided over trunk groups
dedicated to DA Access Service or it may be combined with
the customer's FGB, FGC, FGD, BSA-B, BSA-C or BSA-D
Switched Access Service as set forth in (1) and (2)
following.

#### (1) Dedicated Trunk Groups

When the customer requests trunk groups dedicated to DA Access Service, a Direct-Trunked Transport facility is required to transport the DA Access Service Call from the Telephone Company's serving wire center to the DA location. An Entrance Facility for the dedicated trunk groups is also required for transport of the DA Access Service Call from the customer premises to the serving wire center. When dedicated trunk groups are requested, address signaling is not provided on either the Entrance Facility or the Direct-Trunked Transport.

When dedicated trunk groups are requested, the Telephone Company may require the customer to order a separate trunk group for each NPA. Separate trunk groups will be required when the Telephone Company notifies the customer that the mechanized search of its data base and its mechanized operator practices require a mechanized identification of the NPA code for which the customer's end user desires DA information.

Certain material and revised material appearing on this page formerly appeared on Original Pages 9-4 and 9-5.

Certain material and revised material previously appearing on this page now appears on Original Page 9-5.1.

(This page filed under Transmittal No. 2295)

Issued: September 1, 1993 Effective: December 1, 1993

(T)

#### ACCESS SERVICE

- 9. <u>Directory Assistance Access Service</u> (Cont'd)
  - 9.3 Service Provisioning (Cont'd)
    - 9.3.1 Manner of Provisioning (Cont'd)
      - (C) (Cont'd)
        - (2) Combined Trunk Groups

When the customer requests to have DA Access Service (C) combined with FGB, FGC, FGD, BSA-B, BSA-C or BSA-D traffic, a Tandem-Switched Transport facility is required (i.e., DA Access Service can only be combined with tandem routed trunk side Switched Access Services). An Entrance Facility for the trunk groups combining the trunk side Switched Access Service and the DA Access Service is also required for transport of the DA Access Service Call from the customer premises to the serving wire center. When DA Access Service is combined with tandem routed trunk side Switched Access Services, wink start-start pulsing signaling is provided at the access tandem (Ċ) switch.

DA Access Service using combined trunk groups allows (T) for transport of the DA Access Service call (1-411, 555-1212 or NPA-555-1212) from the customer's premises to the access tandem to the DA location. However, only NPA codes handled by the DA location (T) served by the access tandem switch will be processed. (M)

- (D) Trunk side switching is provided at the DA location.
- E) DA Access Service is ordered under the provisions specified (T) in Section 5 (Ordering for Access Service). Also included (M) in that section are charges associated with ordering DA (T) Access Service. (T)

Material and revised material appearing on this page formerly appeared on Original Pages 9-4 and 9-5.

(T)

(T)

#### ACCESS SERVICE

## 9. Directory Assistance Service (Cont'd)

### 9.3 <u>Service Provisioning</u> (Cont'd)

# 9.3.3 Interface Groups

- (A) Switched Transport Interface Groups 2 through 9, as specified in 6.7.6 (Interface Groups), are provided for terminating the Directory Transport at the customer's premises. In addition, for each Interface Group, premises interface codes are available as a function of the Telephone Company switch supervisory signaling and Switched Access feature group. These premises interface codes are also specified in 6.7.6.
  - When DA Service is provided over FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service, the premises interface code for the combination will be the available premises interface code provided for the FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service ordered by the customer.
  - When DA Service is provided over access service trunk groups dedicated for DA traffic, the following premises interface codes are available:

4DS9-15	6EA2-E	4RV2-0
4DS9-31	6EA2-M	4AH5-B
4DS0-63	4SF3	4AH6-C
4DS6-44		4AH6-D
4DS6-27		

(B) Except as specified in 9.4.4 (DA Minimum Period), the interface groups and premises interface codes provided for DA Access Service utilizing Direct-Trunked Transport (T) facilities are subject to the ordering conditions specified in Section 5 (Ordering for Access Service). For purposes of applying the ordering regulations, a DA location is considered to be a customer's end user's serving wire center.

(This page filed under Transmittal No. 2295)

Issued: September 1, 1993 Effective: December 1, 1993

(T)

(D)

#### ACCESS SERVICE

- 9. <u>Directory Assistance Access Service</u> (Cont'd)
  - 9.3 <u>Service Provisioning</u> (Cont'd)
    - 9.3.4 Transmission Specifications

DA Access Service is provided with either Type A or Type B transmission specifications described in 6.7.8 (Transmission Specifications). The specifications for the associated parameters are guaranteed to the DA location, whether routed directly or via an access tandem.

- (A) When DA Access Service is provided over trunks dedicated to (T) DA traffic, transmission specifications are provided as (T) follows:
  - Type B transmission specifications are provided with interface groups 2 through 9 when routed direct to a DA location
- (B) When DA Access Service is combined with a customer's FGB, (T) FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service transmission specifications are provided as outlined below:
  - Type B transmission specifications are provided with interface groups 2 through 9 when DA Access Service (T) is combined with FGB or BSA-B Switched Access Service
  - Type B transmission specifications are provided when DA Access Service is combined with FGC or BSA-C Switched Access Service
  - Type A transmission specifications are provided when DA Access Service is combined with FGD or BSA-D Switched Access Service

(N)

(N)

#### ACCESS SERVICE

# 9. <u>Directory Assistance Access Service</u> (Cont'd)

### 9.3 <u>Service Provisioning</u> (Cont'd)

#### 9.3.6 Testing (Cont'd)

### (B) Testing Capabilities

In addition, to the acceptance tests described above, which are included with the installation of service, Additional Cooperative Scheduled Testing and Manual Scheduled Testing are available as described in 13.3.6 (Testing Services for Switched Access Service). For DA Transport facilities, as set forth in 9.3.1 (Manner of Provisioning), Additional Cooperative Testing and Nonscheduled Testing are available as described in 13.3.7 (Testing Services for Special Access Service, MegaLink Custom Service and Self-healing Transport Network (STN)).

The following testing capabilities are available on an ongoing basis when DA Access Service is combined with FGB, FGC, FGD, BSA-B, BSA-C or BSA-D Switched Access Service and routed through an access tandem to the DA location:

In the terminating direction, where equipment is available, FGB, FGC, FGD, BSA-B, BSA-C and BSA-D are provided with:

- seven digit access to balance (100 type) test line,
- milliwat (102 type) test line,
- nonsynchronous or synchronous test line,
- automatic transmission measuring (105 type) test
- data transmission (107 type) test line,
- loop around test line,
- short circuit test line, and

# 9. <u>Directory Assistance Access Service</u> (Cont'd)

# 9.4 Rate Regulations (Cont'd)

# 9.4.2 Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for a	
specific work activity (i.e., installation or change to an	
existing service.) Nonrecurring charges are applicable for	
installation of services, installation of DA Transport	(C)
facilities, installation of features, and for certain service	(c
rearrangements. In addition, an Access Order Charge may be	` '
applicable as specified in 5.3.1 (Access Order Charges).	

The nonrecurring charges which apply for DA Access Service are	
the applicable nonrecurring charges for Switched Transport	(C)
facilities and FGB, FGC, FGD, BSA-B, BSA-C and BSA-D Switched	(C)
Access Service as described in 6.8.2 (Nonrecurring Charges).	(T)
